

Sahara CodeSwitch Africa Challenge — HakiScribe submission

This folder packages deliverables for the **Legal & Public Services** track of the Intron Sahara CodeSwitch Africa Challenge.

Contents

File	Purpose
PROBLEM_AND_SOLUTION.md	Problem framing and HakiScribe + Sahara approach
BENCHMARK_RESULTS.md	Multi-model ASR comparison (Sahara vs Whisper baselines)
RESPONSIBLE_AI.md	Ethics, consent, privilege, data handling
DEMO_SCRIPT.md	One-take demo video script
TECHNICAL_DOCUMENTATION.md	Architecture, Sahara integration, source locations, local run
SUBMISSION_MANIFEST.md	Final form mapping, links, and pre-submit checklist
DATASET_PROVENANCE.md	AfriSwitch source, licence, and fixed-sample evaluation plan

Code

- Main app: repository root [README.md](#)
- Intron connector + Sahara refine: [hakiscribe-backend/app/services/transcription.py](#), [integrations.py](#)
- Benchmark harness: [hakiscribe-backend/benchmarking/](#)

What's new for this challenge

1. **Intron Sahara connector** (API key) in Settings → Connectors
2. **Multilingual / code-switch sessions** refine with Sahara legal court-hearing mode on Stop
3. **Benchmark harness** comparing Sahara, OpenRouter Whisper, and Groq/OpenAI Whisper
4. **Test clip scaffolding** with challenge metadata under `benchmarking/test-clips/`

Default live ASR remains OpenRouter Whisper — Sahara is additive.
