

Demo video script — one unbroken take (~3–4 minutes)

Record screen + mic. Use a consented code-switched legal snippet (under 90 seconds).

0. Fast path (no mic) — multilingual seeds

1. Private workspace → **New session** screen
2. Click **Open multilingual court & client demos**
3. Library gains multilingual sessions mixed among existing matters (EN–SW plus Hausa, Yoruba, Zulu intakes; titles look like normal desk work):
 - Court proceeding — Milimani Commercial Court, Wanjiru Holdings lease arrears
 - Voice memo — Wanjiru Holdings, Kilimani remedial works follow-up
 - Client briefing — Otieno, ELRC directions after mention
 - Client call — Coastal Sacco, Nyali statutory notice plan
 - Follow-up intake — Githunguri succession, revocation advice
 - Site briefing — Karanja & Sons, Westlands distress after lock-out
 - Client intake — Bello Trading, Kano warehouse lease dispute (EN–Hausa)
 - Client call — Adeyemi & Co, Lagos employment notice review (EN–Yoruba)
 - Mention notes — Dlamini, Johannesburg eviction defence (EN–Zulu)
4. Walk Action Tray on any of them; optional: connect Intron and record live for the video

1. Connect Intron (15s)

1. Open HakiScribe → **Settings** → **Connectors**
2. Find **Intron Sahara (Voice AI)**
3. Paste API key from voice.intron.io → Developers → **Connect**
4. Confirm connected badge

2. New multilingual session (20s)

1. **New session** → source **Microphone**
2. Language: any African pair (e.g. **English + Kiswahili**, **English + Hausa**) or **Multilingual / African code-switch**
3. Note the inline hint that Sahara refines on Stop
4. **Start recording**

3. Record code-switched legal speech (45–60s)

Speak naturally (example):

> "Mheshimiwa, Civil Suit Milimani CS 204 — Wanjiru Holdings versus Kamau Enterprises. The defendant owes KES 450000. Hatutaki kucheleweshwa tena; we request a hearing within thirty days."

- Tap **Flag** once on a key admission or date
- **Stop** — wait for "Refining with Sahara..." then success toast

4. Speakers and privilege (30s)

1. **Speaker screen** — relabel Speaker 1 (e.g. "Adv. Wairimu")

2. **Redact screen** — lock one line as privileged/off-record (show it excluded later)

5. Action Tray → draft (45s)

1. **Analyze** → Action Tray appears with draft_document, calendar, matter, etc.

2. Select **draft document** → **Generate**

3. Open result — show letter grounded in transcript

4. Optional: **View source** jump to segment

6. Benchmark mention (15s)

Briefly show submission/BENCHMARK_RESULTS.md or run:

```
cd hakiscribe-backend && python -m benchmarking.run_benchmark
```

Closing line

"HakiScribe turns African code-switched legal speech into structured work — with Sahara for the transcript and an Action Tray for what leaves the desk."
