

HakiScribe — Sahara CodeSwitch Africa submission manifest

This is the single source of truth for the Legal & Public Services submission.

Required item	Repository artifact	Submission action	Status
Solution description	submission/PROBLEM_AND_SOLUTION.md	Paste or upload	Ready
Working-prototype demo	submission/DEMO_SCRIPT.md	Record and host an unlisted/public YouTube video	Recording required
Code / technical documentation	README.md, SPEC.md, submission/TECHNICAL_DOCUMENTATION.md	Link the repository and docs	Ready
Benchmark report	submission/BENCHMARK_RESULTS.md	Replace Not measured with harness output, then link/upload	Measurements required
Ethics / inclusion note	submission/RESPONSIBLE_AI.md	Paste or upload	Ready
Benchmark audios (optional)	hakiscribe-backend/benchmarking/test-clips/	Upload only consented, de-identified audio and metadata	Optional

Links for the form

- Product: <https://hakiscribe.lovable.app/>
- API health check: <https://hakiscribe-backend.onrender.com/health>
- Source repository: <https://github.com/Isomkevin/haki-scribe>
- Demo video: **record and add the final public/unlisted YouTube URL here**

Final checks

- ☐ Demo shows Sahara processing code-switched speech and a downstream legal-work artifact.
- ☐ Every benchmark value came from the checked-in harness output.
- ☐ Sahara and two other ASR models ran on identical audio.
- ☐ Dataset provenance, sample size, failures, and limitations are disclosed.
- ☐ No client, privileged, identifying, or non-consented audio is uploaded.
- ☐ Video and repository links open while logged out.
